

THE CLAMPRITE GAGE

- Protect Your Spindles
- Increase Cutter Life
- Prevent Unscheduled Downtime

Accuracy is traceable to NIST

Patent 6533507

The Deluxe Clamprite Gage Kit

Includes holder and the pull-stud, in a foam fitted box. Quick and easy to assemble, it's ready for use in less than a minute!

Retail: \$749.00
(most applications)

The Standard Clamprite Gage Kit

Same as the Deluxe Kit (above), except the holder and pull-stud are not included. This one kit tests all machines from 30 to 60 CAT, BT, and other tapers. Specify range: 3,000 Lb. 5,000 Lb. or 10,000 Lb. (15,000 Lb. available at extra cost — inquire)

Retail: \$595.00
(3k & 5k Lb. ranges)

Metal Tote Box

Foam-fitted protection for the Clamprite Gage Kit, with room for a 40-taper toolholder, a 50-taper toolholder, and a tray for carrying pull-studs, transfer screws, and other tools.

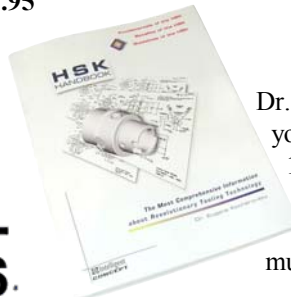

Retail: \$24.95

The HSK Handbook

Dr. Eugene Kocherovsky tells *everything* you ever wanted to know about HSK. Over **150** excellent charts and color illustrations, including a detailed blueprint of each HSK application! This book is a must for all HSK users. Retail \$190.00

The best, most economical drawbar testing gage on the market today! Tests drawbar force of CNC Mills in less than a minute. Reads directly in pounds so no calculations are needed. This is an essential tool for any shop involved in precision machining.

Drawbar force declines from normal machine use. A small drop in force greatly reduces cutting tool life, and will degrade the spindle taper and tool holders.

Are your operators struggling to hold tolerances and good surface finishes on your parts? Order your gage today — see if your spindles can still **Clamprite!**

Tests all 30 to 60 taper spindles + many others.

(only HSK spindles require adapter, see below)

The HSK Adapter

Allows Clamprite Gage to fit HSK spindles

Patent Pending

HSK spindles must maintain much higher drawbar force than other types of comparable size! Test HSK spindles frequently using this adapter with the Clamprite Gage. Retail \$395.00 (HSK-A63)

Transfer Screws and Pull-Studs

Stepped Transfer Screw as provided in Standard Kits. Extra-length fits longer holders, or trim it to fit.

Stepped Transfer Screws:	Retail \$24.95
Non-Stepped Screws (for 50-taper):	\$12.95
Prepared Pull-Studs (most applications)	\$44.00
